

Order Your Photos Carbon Neutrally

My partner GotPhoto supports carbon offset projects and measures, reduces and compensates for the CO₂ emissions of every photo order.

So your photo purchase with me is carbon neutral, too.

What Is “Carbon Neutral”?

Carbon neutral means: all CO₂ emissions of my online shop provider GotPhoto are measured, reduced and offset by certified projects for climate protection.

What Is Offset?

From the online shop until the arrival of the photos with the family—every step is taken into consideration. Learn what exactly is included under the link on the reverse side.

What Does That Mean for You?

Together with me you can contribute to climate protection. The carbon footprint of every order is offset and reduced.

You can retrace the carbon neutrality of my online shop provider and its service through the “Carbon Neutral Service” label and the ID tracking number. Receive detailed info about the compensation and the supported offset projects in the GotPhoto company profile at ClimatePartner under
